By law, smoking is banned within the grounds of, and within four metres of an entrance to, all childcare centres, kindergartens, preschools and schools from 13 April 2015.¹

Where does the ban apply?

Smoking is banned within the grounds of all Victorian childcare centres, kindergartens, preschools and primary and secondary schools in Victoria. This includes all Government, independent and Catholic schools.

Smoking is also banned within four metres of all entrances (pedestrian access points)² to the premises.

The diagram below shows an example of where the smoking ban applies at a childcare centre.

When does the ban apply?

Childcare centres, kindergartens and preschools

The smoking ban applies to childcare, kindergartens and preschools while they are being used to provide a children’s service.

Schools

The smoking ban applies at primary and secondary schools at all times, no matter whether the building or school grounds are being used for education purposes or other purposes. The ban therefore applies when other activities are taking place on the school grounds, such as fetes or sporting events, as well as during school hours.

How will people know about the ban?

An education campaign, including newspaper, radio and online advertising, will inform the public of the new law. Signs will also be displayed in the smoke-free area.

¹ Section 5RD of the Tobacco Act 1987.
² A pedestrian access point in relation to premises is defined in the Tobacco Act 1987 as a door or gate by which a pedestrian can enter or exit the premises.
Why does the ban exist?

To protect children and young people from the dangers of second-hand smoke

This ban ensures that children and young people can enter and leave these areas without being exposed to harmful second-hand smoke.

Second-hand tobacco smoke is particularly dangerous to children and young people because they have smaller airways and less developed immune systems compared to adults.

To reduce the role modelling of smoking behaviours around children and young people

Children and young people are more likely to view smoking as socially acceptable when they regularly see people smoking.

Banning smoking in areas used by children and young people will help to denormalise smoking behaviour and discourage children and young people from taking up smoking.

How will the ban be enforced?

There is strong community support for banning smoking at public places regularly attended by children. This means most people will voluntarily comply with the smoking ban and expect others to do so.

Inspectors authorised under the Tobacco Act 1987 may provide information about and, when necessary, enforce the ban. The first priority of the inspector is to make sure smokers understand the ban.

Inspectors may not be available to respond to every complaint, but where circumstances allow, may attend in response.

What penalties might apply?

The maximum penalty for someone breaking these laws is five penalty units, with an infringement penalty of one penalty unit.

As of 1 July 2014, a penalty unit is valued at $147.61.3
